

WE PROVIDE THE **BEST TRIMMING** **SOLUTIONS**

Under **HortiHANDS**, PackTTI offers innovative (shape) pruning solutions for the horticulture sector, including EazyCut, Venti and RAP. These are the systems with the best price-quality ratio. **HortiHANDS** is the worldwide distributor of EazyCut and uses local dealers. **HortiHANDS** is also the Benelux dealer for the Venti and Rap systems.

EasyCut Trimming Systems

- With integrated fan for collecting trimmings
- Perfect cutting due to hard steel, self-sharpening fine cutting knives
- Light weight and easy to operate
- Fast return on investment

HAND-HELD PRUNING SYSTEMS

EasyCut pruning machines result in considerable cost savings! The compact EasyCut 400 and 600 can be worn by one person. The wider EasyCut 1201 and 1601 models are carried by two people, but can also be installed in a frame. The 1201 models is also available in a curved model ("EasyCut curved"). These EasyCut machines are suitable for cutting and harvesting a variety of plants, seedlings and herbs like arugula, micro greens, salad, samphire, sedum, ornamental grasses, roses, hydrangeas, violets, lavender, etc.

ZERO EMISSION

The EasyCut 600 and 1201/1601/VPS and Curved machines can also be delivered in an electrical and a battery driven version.

with EasyCut*

EAZYTCUT 600 ELECTRIC

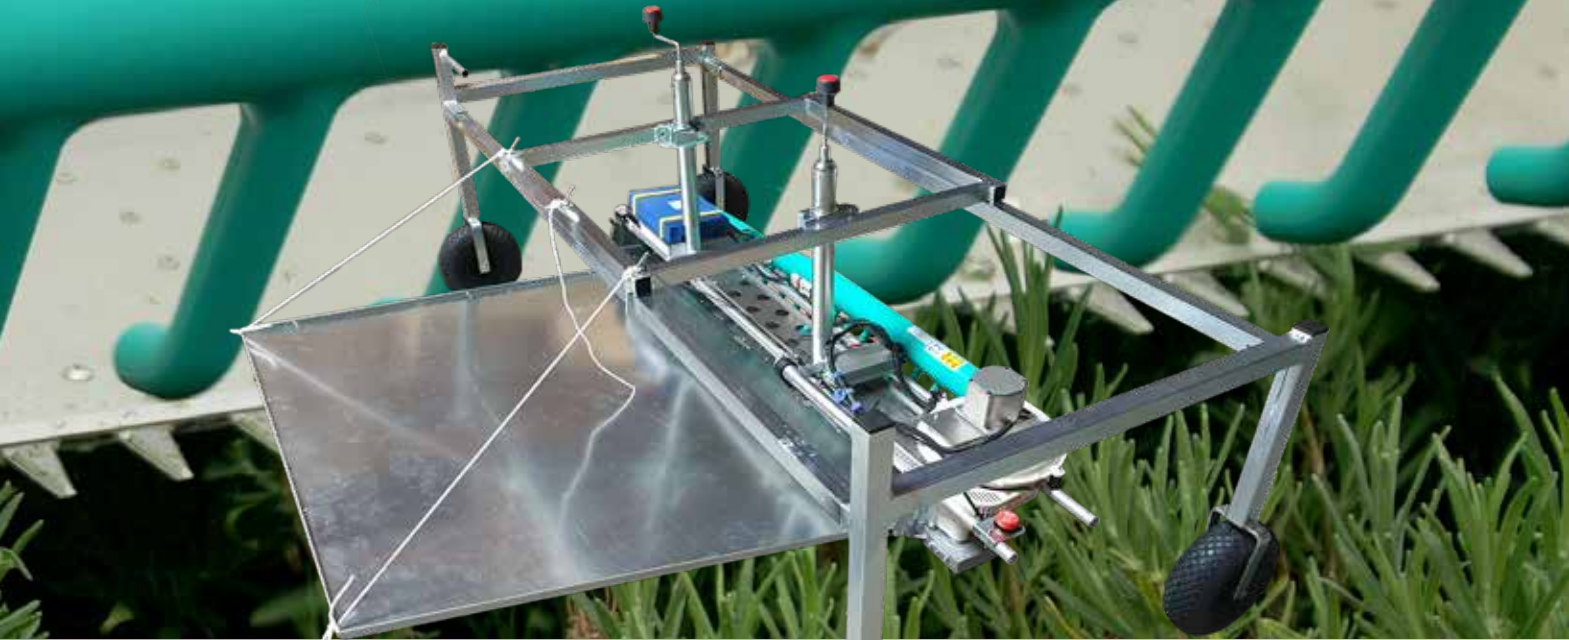

The EasyCut 600 can be placed on a fixed frame to trim trays or pots and will be available with a battery soon.

EAZYCUT 1201/1601 ELECTRIC

The EC1201 and the EC1601 can be equipped with a silent electric motor which can be powered by a 48V battery or a power cord. (110V / 230V).

EAZYFRAME SOLUTIONS

The mobile EazyFrames are lightweight width. (up to 4 meters wide) The galvanized of wheels. The pruning height can be ad- cut image. Our EazyFrames are available for custom frame for the 'curved' EazyCut model to optimize the harvest of lavender, tea, etc.

and easy to adjust, both in height and frames can be supplied on different types justed very accurately, creating a perfect the EazyCut 1201 and 1601 models. We have a

EAZYTABLE MOBILE TABLE FRAMES

A mobile frame has been developed for growing tables based on the EazyCut 1201 and 1601. This frame can be easily operated by two people and can be used anywhere in the greenhouse. Up to 20 tables can be pruned per hour, which can lead to enormous cost savings

EAZYCUT VPS

Light harvesting frame on four wheels for cutting and harvesting beds in the greenhouse or in the field. Due to the perfect cut quality, the VPS is used for many purposes: cuttings, lavender, tea, herbs and vegetables. Up to a thickness of 8 mm is no problem and this with just one person. The height of the cutting knife can be easily adjusted with the spindles and height scale left and right. The operator walks backwards and the blowpipes blow the cuttings into the bag. The bag is supported by a plate so that it does not rub against the crop.

Trimming Systems

- **Vacuum trimming machine for conveyor belt systems or individually to setup**
- **Popular with all young plant growers**
- **Cost-saving and high quality technology**
- **Super clean result**

VENTI FOR POTS & TRAYS

The Venti pruning machine is fully electric driven. The strong fan creates a strong vacuum and removes all branches and leaves during pruning. All cut material is collected in a small or large box. The two side fans ensure an upwards airflow so that the side branches are also pruned.

VENTI SBO

The Venti SBO is a wide trimming machine for growing tables including quiet and light fans. All cuttings are sucked up undamaged into the container (can be used for young plants) and can be easily collected through wide doors. The photo shows a wide version, but Venti SBO is also available for smaller sizes of pots and trays with a working width of 50 cm or 70 cm

VENTI FOR TABLES & THE FIELD

Special models have been developed for tables and in the field based on the patented Venti Technology. The table pruners mostly have a semi-permanent place in the greenhouse. The field pruners are mobile and can be powered by a long cord or generator.

Form Trimming Systems

PRUNING IN THE OPEN GROUND OR IN A POT WITH THE RAP 10

- The RAP 10 is a compact and versatile trimmer.
- Bulbs of 15 to 55 cm can be shaped extremely productively (up to 600 per hour).
- The diameter can be adjusted in seconds.
- The maintenance costs are minimal and the payback time is extremely short.

RAP 205

- Pruning machine for high and low plants.
- Can trim round, pyramid and conical shapes (diameter 15-55 cm, height up to 75 cm)
- Light frame enables easy transportation

HIGH CAPACITY BF1

The BF1 form trimmer has a high capacity thanks to the fast rotating blades. Pots and plants of all sizes can be pruned in different diameters and shapes. The installed blower helps to keep the trimming area clean. All speeds are adjustable to achieve the best result with the least wear. This efficient and compact belt pruner is suitable for (medium) large pots Capacity up to 600 pots per hour.

SUPER CAPACITY BF6

The BF6 high speed form trimmer has two belts to turn the pot. The fixed knives can be placed in different positions. This allows many forms to be cropped, such as sphere and pyramid shapes. The continuous system has a very large capacity of trimming up to 1500 pots per hour. Pots and plants of all sizes can be cut in different diameters and shapes. All speeds are adjustable to achieve the best result with the least wear. This efficient and compact belt trimming machine is suitable for small and medium-sized pots.
